

We are a medium-sized, international company that focuses on developing and building systems for the generation, treatment and purification of hydrogen and synthesis gases. Since 1965 we have developed into one of the world's leading companies in our market.

We are looking for a committed to expand our team

Commissioning Engineer (m/f/d)

Your challenges

- Commissioning and maintenance of our process plants
- Optimisation of our process plants
- Supervising of technical staff
- Troubleshooting
- Providing technical support for our clients

Your profile

- Professional education in the field of process/mechanical engineering or equivalent
- Experience with commissioning and maintenance of process/chemical plants desired
- Willingness to travel
- Good skills in English language and MS- Office

We offer

- Performance-based pay with flexible working hours
- Short lines of communication, open doors and a helpful, committed team of colleagues
- Open-ended employment contract in a solid, owner-managed company

If you are interested in being actively involved in a technology-oriented company with short decision-making paths, we would be happy to receive your detailed application stating your salary expectations and your earliest possible starting date.
